

LONG RUN LED Strip

LONG RUN101

Constant current IC embedded in circuit, long run.

Capable of running up to a maximum length of 20 meters with only one-end power supply with no significant brightness drop.

Simplified installation and wiring, suitable for residential lighting, Commercial lighting.

Long run

Constant current IC embedded in circuit, no brightness drop.

Dotless

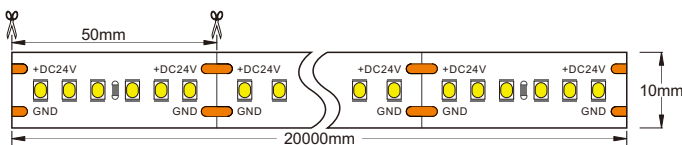

Excellent Light-consistency with high efficiency up to 120Lm/W.

Double layer FPC

Balancing the voltage dropping, heat dissipation and flexibility.

DIMENSIONS

PRODUCT PARAMETERS

Model	LONG RUN101
Input	DC24V
LED/M	120pcs/M
M/Reel	20M/Reel◆
LED type	SMD
CRI	>90
IP rating	IP20
Power	7.2W/M / 9.6W/M / 14.4W/M
Lumen/M	750 lm/M / 1030 lm/M / 1412 lm/M@3000K
CCT	2200K 2700K 3000K 4000K 5000K 6500K 10000K R G B

COMPATIBILITY

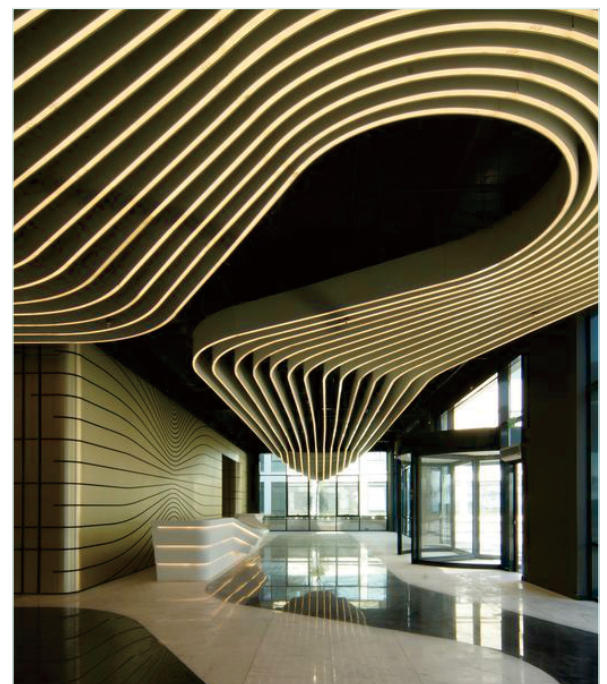

ON/OFF

Triac

0/1-10V

DALI

PWM

◆ Connection length when one side feeding: 20m(7.2W) / 18m(9.6W) / 13.5m(14.4W).

★ Please conduct a match test between the strip light and dimmable controllers if dimmable control method required to avoid any performance failure, as the strip light contains the constant current IC, differing from normal constant voltage strip light.
